## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 5-25 are allowed.

The following is an examiner's statement of reasons for allowance: Rodgers (USPN 5372493) and Kawano et al. (USPN 6325276 B1) teach the invention essentially as claimed but do not teach rollers arranged in configuration so as to enable transfer of the coating from the roller to the belt. See also Sprengling (USPN 4496415). Although it is known in the art to selectively apply flux to the top of fin peaks, there is no disclosure of a process wherein this step is followed by insertion into preformed holes in a header tank. See Kuono et al. (USPN 6199750 B1) and Halstead et al. (USPN 5251374). In this manner, a minimal but sufficient amount of flux is employed thereby enhancing bonding while reducing waste and preventing stains in the manufacture of heat exchangers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
